SUMMARY

Third-year Bachelor of Computing student at Belgium Campus iTversity, majoring in Business Intelligence, seeking an internship in data science, business intelligence or data engineering. I build complete projects, from cleaning and modelling data in Python and R to dashboards and deployed web apps.

PROJECTS

Telco Customer Churn Prediction and ML Web App INDIVIDUAL

Python • Scikit-learn • Streamlit • Dash • Render

- Built a classification model to predict customers likely to cancel their subscription.
- Deployed an interactive web app that shows risk flags and practical retention recommendations.

South African Unemployment & Labour-Market Analysis TEAM OF 3

R • RStudio • Power BI • Random Forest • BI 381

- Four-milestone team project on unemployment risk and labour-market exclusion using 2024 survey extracts. Work rotated across stages so every member understood the full pipeline.
- Cleaned the data in R, selected and trained the Random Forest model, and built the Power BI dashboard to support decisions.

Store Item Demand Forecasting INDIVIDUAL

Python • LightGBM • XGBoost • Pandas

- Forecast demand for 50 items across 10 stores over a three-month horizon from historical sales data.

PRJ381 Group Project TEAM OF 9

In progress

- Serve as the IoT communication agent in a nine-person team, making sure every component connects properly and data flows smoothly across the system.

Other academic group projects TEAM

Power Apps • Oracle • IoT • HTML/CSS/JavaScript

- Power Apps business application built by a team of nine (INF 282 and INF 382).
- Fitness web app in HTML, CSS and JavaScript (second year).
- BOOKSTOREDB: bookstore database on Oracle Autonomous Transaction Processing.
- IWOS: IoT-enabled mobile weather observation system.

TEAMWORK

- Collaborated in university project teams of 3 to 9, taking varied roles as each project needed, including project manager, assistant and IoT communication agent.

AT A GLANCE

19 distinctions

34 subjects passed, none failed

68.9% weighted average

EDUCATION

Bachelor of Computing, Business Intelligence
Belgium Campus iTversity, Pretoria
2024 – present • 297 credits achieved

- Highest results: Database Development 181 (86%), Project Management 281 (86%), Innovation & Leadership 101 and 102 (85%), Programming 181 (84%), Database Administration 381 (81%).
- Modules: Machine Learning, Data Warehousing, Database Development and Administration, Statistics, Project Management, Internet of Things, Software Analysis & Design, Research Methods.

SKILLS

PROGRAMMING

Python R SQL C# JavaScript HTML CSS

BI & VISUALISATION

Power BI Tableau Excel

MACHINE LEARNING

Scikit-learn LightGBM XGBoost Random Forest Pandas

DATABASES

SQL Server MySQL Oracle MongoDB MS Access

TOOLS

Git GitHub VS Code Visual Studio Cisco Packet Tracer Microsoft Teams

LANGUAGE

English (professional working proficiency)
